

For Doctorate Students
Uncharted Worlds are
in your HANDS

*I have no special talent.
I am only passionately curious.*

—Albert Einstein

Doctorate students will effectively showcase their research within a limited time span of 3 minutes. Please cast your vote to the researcher that inspires you the most!

Join the Audience !

What's the "Home for Innovative Researchers and Academic Knowledge Users (HIRAKU)" Program?

The "Home for Innovative Researchers and Academic Knowledge Users (HIRAKU)" Program has driven multiple initiatives, aimed at establishing a sustainable framework which enables highly-skilled young researchers, leading the next generation, to develop within the region and attain successful positions. The HIRAKU Program aims to develop young researchers who will boldly challenge themselves across the various research disciplines, which in turn will enhance their aspirations and passion to transform society. Furthermore, the HIRAKU Program has formed an industry-academia-government consortium, engaging public and private universities mainly located in the Chugoku and Shikoku regions across Western Japan, as well as a growing number of institutions/corporations in the public and private sectors, with the aim of providing young researchers, who will lead the future generations, with the opportunities to maximize their exceptional competencies.
